

FULL STACK WEB DEVELOPER

Enthusiastic Full Stack Web Developer with 1,200+ hours of experience in MERN stack. Skilled in developing RESTful APIs and leading development teams. Proficient in HTML, CSS, JavaScript, React, Node.js, and MongoDB. Adept at building robust web applications and driving project success.

EXPERIENCE

Green Catalysator IT-AB
Software developer

June 2023 - Present

Responsibilities :

- Engineered a standalone microservice for survey management, seamlessly integrating with other microservices.
- scheduled email notifications using Redis server and Node cron jobs to enhance communication and task automation.
- Facilitated complex file handling across microservices, ensuring efficient data sharing and retrieval.
- Conducted rigorous testing and documentation of APIs, guaranteeing seamless integration and robust performance.
- Reviewed and validated code for consistency and quality before deployment to test servers, ensuring reliable deliverables.

PROJECTS

WakeHealthy

[view Github](#)

[view app](#)

Tech Stack: React, Node.js, JavaScript, Chakra-UI

Responsibilities:

- Developed authentication features using Redux.
- Led the team to maintain the codebase and implement new features.
- Managed cart functionality and course selection (online and offline).

Mini-Typing-Tutor
